

User guidelines for the Lupus Image bank

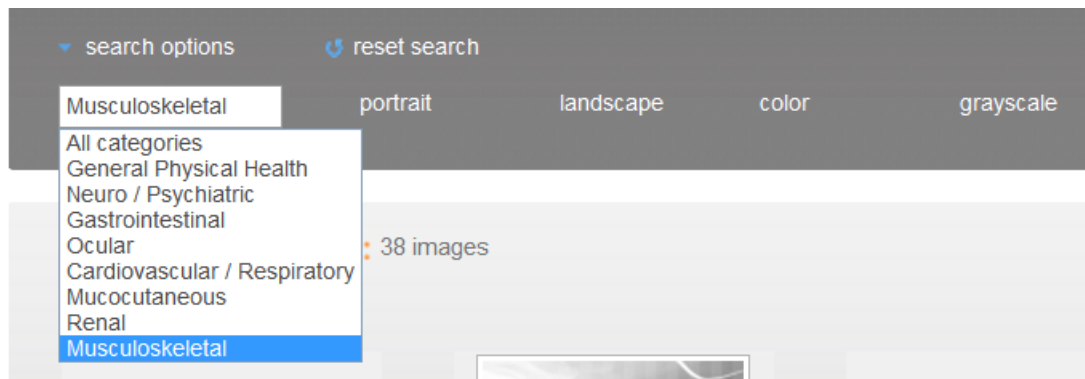

<http://www.lupusimages.com/>

## Search

You can search on free text by typing the keyword you are looking for in the search box and click on 'search'.

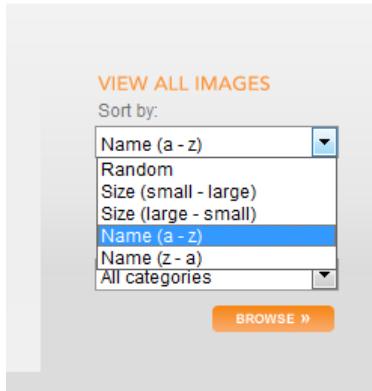

Alternatively you can use the dropdown box to browse categories. By clicking on the boxes to the right of the dropdown box you can modify your search to the required output

Once you have made a search, please click on reset search when you want to make a new search.

## Search results

You can structure your search results by selecting your preference in the drop down box called "**VIEW ALL IMAGES**"

You can adjust the number of images per page by clicking the preferred amount

Thus function appears once you have executed a search

### Save search

You can save your searches once you have registered and/or logged in on the image bank. To register click on register in the footer of the screen. Your searches will be available on your personal page

## Image details

When you click on an image, the image will pop up in a bigger format, with the title underneath. Please click on 'view image details' at the bottom of the image, to see the full image details available. These details include the title, source and description of the image. From here you can also download the image and request copyright permission for using the image.
